

Merge this

A live publishing demo

This one-pager was attached to a use case submitted through the catalog's public web form and published live during the August 27, 2026 work-group walkthrough.

Big Cities Health Coalition — use case catalog prototype

THE PUBLISHING PATH

What happened between the web form and this PDF

1 — Submitted

A contributor filled in the catalog's web form. No code, no accounts to set up beyond GitHub sign-in.

2 — Turned into a pull request

A workflow read the form, checked it against the content model, and opened the pull request automatically.

3 — Checked by machines

Automated checks validated the fields, links, and file sizes, and rendered this PDF's thumbnail.

4 — Reviewed by a person

A maintainer read the entry and clicked Approve. Nothing publishes without this step.

5 — Merged and live

One click on Merge; the site rebuilt itself and the page appeared a few minutes later.

See it yourself

The catalog: crypticpy.github.io/bchc-ai-use-case-catalog

The open-source template: github.com/crypticpy/phct

The maintainer guide: [docs/admin-guide.md](#) in the template repository

Everything shown is public and free to run. This is a prototype presented for the work group's review — nothing here is being sold.
